

What is C.V.?

C.V. stands for Commissionable Volume, it is the value that is placed on a product in the product line to use as the designated number to pay commission.

As a new product is brought online it is given C.V. points that allow the company to pay maximum commission on products while also allowing the company to include shipping on a product so that all products are priced to be delivered free to any location in the continental United States. Thus, commission is paid on the product cost, not the shipping cost. The constant cost factor allows people in all parts of the United States to receive free shipping on products and makes the pricing fair for everyone.

Example:

Perfect Male \$79.00 Product Cost	C.V. 70pts
Commission calculated on 70pts @	20% = \$14.00

Perfect Woman \$79.00 Product Cost	C.V. 70pts
Commission calculated on 70pts @	20% = \$14.00

Perfect Male \$79.00 =	70CV points
Perfect Woman \$79.00 =	70CV points
Perfect Aloe-Min \$65.00 =	50CV points
Perfect Cell Defense 59.00 =	50CV Points

Perfect Health For Life will assign C.V. points to all products in the product line as they are added as a part of the regular inventory into the product line. This is a standard practice in the Network Marketing Business.
